

TECHNICAL DATASHEET

STALOC INDUSTRIAL QUICK CLEANER

SQ-220

PRODUCT DESCRIPTION

STALOC industrial quick cleaner is suitable for quickly cleaning various surfaces in order to prepare them for the application of STALOC anaerobic adhesives, cyanoacrylates (instant adhesives) as well as other adhesives and sealants.

The product does not leave any residues and is non-corrosive. Product does not harm skin, rubber or sleeves due to its quick evaporation.

Suitable as a cleaner and degreaser for metals (especially as a preparation for primer or paint), glass, ceramics, etc.

Effortlessly removes silicone residues from metals.

APPLICATION

Recommended application – further information can be found in the material safety data sheet.

Apply on the parts that need to be cleaned. Spray from a distance of approx. 10-20 cm. Wait for the product to evaporate in order to provide for enough penetrating time. Wipe with a clean cloth if necessary. Repeat this process for parts with dogged contamination.

Does not harm paint and most plastics, nevertheless we recommend to test the compatibility of the materials in invisible areas or before application in series manufacturing processes.

TECHNICAL PROPERTIES

- deep cleaning and degreasing effect
- removes oils, grease, silicone, wax residues, etc.
- evaporates quickly
- test on plastics and rubber

SAFETY INFORMATION

Please send your request for the latest version of the material safety data sheet (MSDS).
