

TECHNICAL DATASHEET

STALOC EQUIPMENT CLEANER

SQ-205

PRODUCT DESCRIPTION

STALOC equipment cleaner is a special cleaner for metal surfaces. Ideally suited for machinery, sheet metal, engine parts, tools, etc. Easily removes contamination such as anticorrosives, grease, oil, wax, tar, etc. Its special formulation also meets the requirements of the NSF for use in the food industry.

STALOC equipment cleaner is also ideal for easy removal of STALOC KORROTECH 3000 high-performance corrosion protection. It therefore helps to reduce process costs when removing anticorrosives.

APPLICATION

Recommended application – further information can be found in the material safety data sheet

Apply STALOC equipment cleaner onto the surface and provide for a few minutes penetration time (5-15 minutes, depending on the type of contamination / residue that needs to be removed). Afterwards, rinse the treated parts with water.

KEY CHARACTERISTICS

- very good penetration
- very good cleaning and dissolving power
- non-corrosive
- does not leave residue

TECHNICAL PROPERTIES

ATTRIBUTE	UNIT	SPECIFICATION
colour		transparent
basis		alph. hydrocarbons/emulsifiers
agent		100% w/w
density at +25°C	g/ml	0,76 g/ml
working temperature	°C	+5°C bis 35°C
odour		characteristic
flashing point	°C	54°C
shelf life at +25°C	years	10

SAFETY INFORMATION

Please send your request for the latest version of the material safety data sheet (MSDS).
